Advanced practice nursing and vulnerability: a seminar for nurse practitioners and advanced practice nurses

FREE CPD EVENT

BROUGHT TO YOU BY THE ACN BRISBANE
REGION AND ADVANCED PRACTICE COMMUNITY
OF INTEREST (COI) IN PARTNERSHIP WITH:

West Moreton Health

Nurse practitioners and advanced practice nurses work in diverse settings with patients who are often the most vulnerable in our communities. This includes those from low socioeconomic contexts who may suffer from a range of complex health problems.

Many nurse practitioners and advanced practice nurses work in areas that others may ignore, such as prisons, sexual health and mental health facilities. Some of the challenges nurses in these settings manage include drug addiction, chronic pain and serious mental health problems.

The ACN Brisbane *Region* and *Advanced Practice Community of Interest (COI)* in partnership with West Moreton Hospital and Health Service are hosting the FREE CPD event *Advanced practice nursing and vulnerability: a seminar for nurse practitioners and advanced practice nurses*.

The seminar program covers a range of topics delivered by speakers from the West Moreton Hospital and Health Service and has been designed for nurse practitioners and advanced practice nurses.
